COMPANY PROFILE

NIKI Information Technologies is a highly qualified scientific and engineering software company, located at Ioannina in Northwestern Greece, specialized on developing complex and customized engineering software and solutions for world-leading European Industry, like DaimlerChrysler AG, TWT GmbH, Hellenic Vehicle Industry, Hellenic Aerospace Industry, etc. The company is providing highly specialized services to the European and Greek Industry in the fields of Information Technologies (Engineering Data Management Solutions, Scientific Problem Solving, Simulation Technologies, Virtual Reality and HCI) and Computer Aided Engineering (CAx).

The Company has established strategic partnerships with Information & Engineering Technologies companies in Germany for more than a decade.

We specialize in scientific problem solving and simulation, human cognition, ergonomics, personalized training systems and applications for the product development, automotive, aerospace, health and bioscience information management markets.

NIKI R&D Unit staff forms a team of qualified researchers (computer scientists, mechanical and electrical engineers, designers, mathematicians, physicists, market analysis experts, etc.) and participates in research projects in selected sectors like industrial software engineering, virtual reality, cognitive systems, automotive, product development, biomedical and biomechanical.

NIKI is participating in FP6-IST, FP6-NMP, FP6-SME, BMBF and GSRT funded research and innovation projects related to:

- Biomechanics
- Cybernetics
- Computer science
- Artificial intelligence
- Road transport technology
- Production technology
- Nano Technologies in Manufacturing
