ZIV GmbH was founded by RMV - Rhein-Main Public Transport Authority, the Frankfurt Airport Authority (Fraport AG) and the German Rail (DB Regio AG), to support efficient and integrated traffic and transport systems. ZIV is an institute at the Darmstadt University of Technology and performs scientific research programs as well as their realization into market applications.

Main object of the ZIV is the applied research in the field of traffic and transport, especially traffic management and telematics and the support of innovative multimodal traffic solutions. By the employment of modern technology - particularly the usage of communication technology and informatics - the ZIV is a competent partner for establishing reasonable concepts for public transportation as well as individual traffic. ZIV keeps a solid know how in the field of mobile telematics for positioning and navigation and especially for the integration of such technologies into inter modal applications in traffic and transport systems. For the 2nd Call of the GJU, ZIV is able to contribute to the Area 1A: Road, Rail, Aviation and LBS.
